Profile

Software engineer with 4+ years of experience and a proven knowledge of application development, web design, and programming.

Experience

SOFTWARE ENGINEER, GENERAL ELECTRIC; SEATTLE, WA – JUN 2018 - PRESENT

- Designed and developed a web application using Angular and Spring Framework to drive and test energy market applications, and view and modify data.
- Collaborated in the development of an energy market application in Java.
- Created a test framework that executes functional tests using Cucumber.
- Automated testing and deployment (CI/CD) using Docker (Linux/Windows) and Kubernetes to build, test, and deploy applications in Jenkins pipelines.

FREELANCE WEB DEVELOPER, GILMAN IAN A; SEATTLE, WA – OCT 2017 - MAY 2018

- Created responsive web applications and data visualizations.
- Converted web applications to WebVR.
- Assisted in the optimization and bug fixes for Apple TV software.

ELECTRICAL ENGINEERING INTERN, THE TECH TOYBOX; GAINESVILLE, FL – JUN 2015 - AUG 2015

- Designed proof-of-concept prototypes using AutoCAD, embedded systems programming, and PCB design software.

Education

University of Florida – B.S. Electrical Engineering, 2017

Project Highlights

- Created a web application that stores and displays user-generated comments, and ratings, and allows users to sign up, log in/out, add, edit, and remove content.
- Created games in C# using the Unity Game Engine

Skills

Java, JavaScript, TypeScript, Angular, HTML, CSS, Node, Git, REST, Agile, Visual Studio, Eclipse, JUnit, Maven, Spring Framework, Docker, Jenkins, and more
